Intro & Everything Kits

TEACHING ELECTRONICS IS AS EASY AS PUTTING PEN TO PAPER

Making STEM education fun is just an electric sketch away. Our non-toxic, conductive silver ink pen brings circuitry to life, creating endless possibilities for active learning experiences.

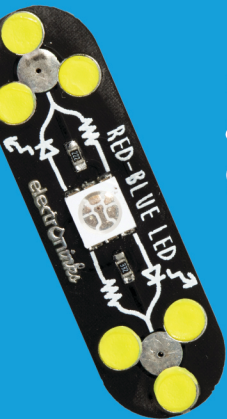

NO ARTISTIC SKILLS REQUIRED, BUT IMAGINATION IS A MUST

Draw freeform circuits on ordinary paper to power a limitless combination of modules that activate lights, sounds, motors and more.

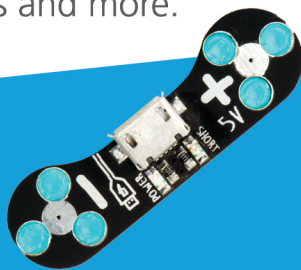

Hands-on Learning

Our hands-on, minds-on approach to learning guarantees "ah-ha" moments

Light Up Your Classroom

Engage classes of 25 to 30 (1-to-1) students and amplify your STEM curriculum with clever, exciting projects

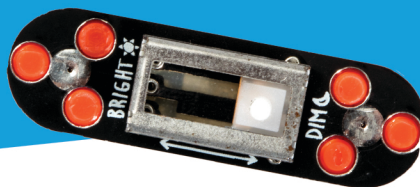

Everything You Need

We're a screen-free experience that requires no additional equipment, so learning begins the moment you open the box

Use Again & Again & Again

Your kit can be used by class after class -- starting fresh is as easy as grabbing a new sheet of paper

Drawing a direct line to confidence in STEM concepts

Circuit Scribe equips you with everything you need for classes of 25-30 (1-to-1) students, including complete lessons to facilitate both individual and collaborative learning experiences.

Everything Classroom Kit:

- Connect to Makey Makey, Arduino, & other coding and electronics systems
- Scalable for Advanced circuitry
- 250+ modules

Intro Classroom Kit:

- Accessible entry for all-ages
- 100+ modules
- Teach theories like power, light, and pathways
